- ## Projects

  - Graduation project
  Tech Park is a smart and safety parking system, implemented by Networking and IOT using Cisco tools "packet tracer".
  it is a technology-based solution that aims to improve the efficiency of search and convenience of the parking process, users can find empty parking slots in the desired placed they are going to.

  - Quiz Template
  Our Quiz Template project demonstrates my proficiency in web development. It employs HTML, CSS, JavaScript, and JSON-based API integration to showcase my skills.

  - Earth Store
  Earth Store is a mini PHP e-commerce platform for selling Wallpapers, It uses PHP sessions to securely manage data.

  - Green Hands
  Green Hands is an innovative web platform we conceived and developed using Laravel framework. This project was driven by our passion for environmental conservation and sustainability. Green Hands serves as a specialized website dedicated to tree planting initiatives and charitable contributions towards reforestation efforts.

  - Home Made Harmony
  Home Made Harmony is a dynamic e-commerce web application that me and my team members conceptualized, designed, and developed using a skill set encompassing PHP, JavaScript, HTML, and CSS. This project was created to demonstrate our expertise in web development and my ability to create a feature-rich, user-friendly online shopping experience.
